Xtra Miles Sdn Bhd (968820-K)

Lighting control plays an important role in modern facility management. Not only to produce ideal living and working conditions but also to achieve the best possible energy balance. Hager's motion and presence detectors ensure energy costs are reduced and the investment pays off within a matter of a few years, while the convenience and increase in safety will continue for much longer.

Created for the automatic control of lighting in both residential and private/public industry sectors. They automatically switch on lighting when movement is detected and turn off the circuit after the preset duration. Bringing comfort and enhanced security for interior and exterior accesses to residential homes and garages, they also provide significant savings in lighting power consumption by illuminating only when necessary.

Hager EE804

Technical Properties

Supply voltage	230 V +10% / -15%
Frequency	50 Hz
Protection class	isol.class II
Protection index IP	IP21
Type of contacts	1NC
Detection angle	360 °
Frontal detecting distance	6 m
Side detecting distance	6 m
Diameter of the floor detection area	6 m
Maximum Mounting Height	4 m
Height of installed product	50 mm
Length	105,5 mm
Mounting type	surface-mounted
Fixing mode	surface-mounting
Max. power with fluo uncompensated lamps	1000 VA
Halogen switching capacity 230V	0/1000 W
Incandescent bulb power	0/1000 W
Brightness measurement range	5/1000 Lux
Time delayed range	5s ; 15min
Operating temperature	0 to 45 °C
Storage temperature	-20 to 60 °C
Colour	white
Sensitivity setting	no
