

*Energy Efficient Detectors*

Presence detector 360° 1 channel

# Hager EE810

Presence Detectors are ideal for controlling lighting in office spaces as they detect large movements and also smaller finite movements, such as people working at a desk. When the area is left unoccupied, the lighting will be switched off, minimizing the energy usage of the area.

High performance presence detectors are suitable for use in residential and commercial premises where they increase comfort and reduce the energy costs drastically. The combination of presence and motion detection area is especially useful in offices, where the motion area may be used in long corridors.

### Hager EE810

#### Technical Properties

Supply voltage	230 V
Frequency	50 Hz
Protection class	isol.class II
Protection index IP	IP41
Detection angle	360 °
Diameter of the floor detection area	12 m
Maximum Mounting Height	4 m
Max. transmission range	12m
Height of installed product	31 mm
Length	100 mm
Brightness measurement range	5/1200 Lux
Time delayed range	1 ; 30min
Operating temperature	0 to 45 °C
Storage temperature	-10 to 60 °C
Colour	pure white
Sensitivity setting	yes
